INOV-8.COM

INOV-8 IS FORGED IN THE FELLS AND MOUNTAINS OF THE BRITISH LAKE DISTRICT

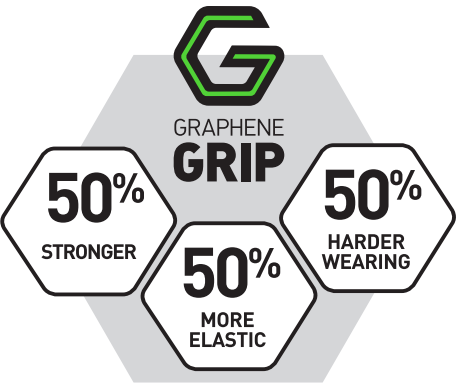

A brand for committed trail runners,
adventure-seeking hikers and training athletes
who push boundaries and stretch limits.

Renowned as a world leader in grip, in 2018
inov-8 launched the world's first-ever sports
shoes to utilise graphene – the strongest
material on the planet.

FROM ROCK TO RUBBER:

- 1555: Graphite rock first discovered in the Lake District fells.
- 2004: Scientists isolate graphene from graphite and were awarded the Nobel Prize for physics in 2010.
- Graphene is 200 x stronger than steel.
- Graphene-enhanced rubber is 50% stronger, 50% more elastic and 50% harder wearing - scientifically proven.
- **GRAPHENE GRIP DELIVERS INSANE STICKY GRIP AND INCREASED DURABILITY – ALL IN ONE RUBBER. NO COMPROMISE.**

MADE WITH
GRAPHENE
FOR THE WORLD'S
TOUGHEST GRIP

THE INOV-8 ARROW SYSTEM

In 2003, years before anyone else, inov-8 pioneered the Arrow System. The number of arrows shown on the lower heel of any inov-8 shoe signifies the drop of that shoe. The drop is the heel-to-forefoot differential, measured in mm.

MORE ARROWS = BIGGER DROP.

FEWER ARROWS = SMALLER DROP.

8MM / 6MM DROP:
Promotes a good natural form for the athlete with the lowest range of motion in the ankle joint, minimising tension on the achilles and calf.

4MM / 3MM DROP:
Promotes a better natural form for the athlete with a medium range of motion in the ankle joint, reducing tension on the achilles and calf.

ZERO 0MM DROP:
Promotes the best natural form for the athlete with largest range of motion in the ankle joint.
